

12th May 2020

Dear Parents & Guardians of MYP 4 Mathematics Standard Students,

Re: MYP 5 Mathematics Extended Placement Test - August 2020

As you know, Chatsworth offers both MYP Math Standard and Math Extended level classes in MYP4 and 5, although all students sit the Standard Level e-assessment exam at the end of MYP5. For this school year, your child has been in the MYP Math Standard Level.

Current students from Mathematics MYP 4 Standard Level will be able to take the Mathematics extended placement assessments held in August 2020 and if the students are able to demonstrate meeting the requirements of the placement assessment, a place will be reserved for the student. Semester 2 Grades will be considered for the placement test. **In addition to the placement test, current MYP 4 Standard students must achieve a minimum grade of 6 at the end of the Semester 2 June 2020 before they will be offered to sit for the placement test.**

Details of the placement test topics will be sent out via email after the results of the Semester 2 Report Card. This means that students in next year's MYP5 Extended Math will have better access to IBDP Analysis and Approaches HL the following year in DP1.

We place students in classes where they will be pushed academically, but not pushed so far above their academic level that causes undue stress.

Please do not hesitate to contact me snanwani@chatsworth.com.sg if you have any questions. If you wish to meet in person to discuss this please contact me to schedule a virtual meeting before the end of May 2020.

Best,

Sunil Nanwani
HOD, Mathematics.
